

# Quality OF Life...

*...starts with a good job*

*A healthy economy is necessary for the things people value in their lives: a good job, a nice place to live, quality schools, safe neighborhoods and more. And, vibrant communities are key to attracting and retaining business.*

*Returning to economic prosperity means finding common ground on complex issues including transportation, education, regulation, and housing.*

- *We need to encourage commercial and residential development.*
- *We must streamline business regulation and permitting.*
- *We should seek strategies to ensure enough buildable land is available for jobs and homes.*
- *We need to make sure that roads, water and sewer are available to meet the diverse economic needs of our growing communities.*

*Quality of Life means a vibrant economy with good paying jobs. It means giving every family the chance to own a home in a safe neighborhood with good schools, parks and recreational opportunities -- and it means giving businesses the opportunity to grow and prosper.*

## REALTORS®
